

## JUNE 2005 UPDATE TO CALCULUS IN MOTION™

This upgrade has 20 new animations in it. They include animations to all AB and BC free response questions from the May 2005 main exams as well as a large collection of animations for teaching the area between 2 curves. These area animations first explain the critical ideas, then present 8 examples (sweeping both vertically and horizontally) where the functions have been chosen but you can easily change the bounds of integration to anything you want. Finally, there are 2 pages (one for vertical sweeping and one for horizontal) that allow you to enter any desired curves as well as the boundaries of integration. This update also includes a replacement to an existing animation (definition of a derivative) that adds even more features to it.

The total cost to current Calculus In Motion™ (on CD-ROM) users is:

- \$30 if you have a basic license (1 computer)
- \$50 if you have an extended license for 5 on-site computers
- \$75 if you have an extended license for 20 on-site computers
- free if you have an extended license to an unlimited number of on-site computers.

Do not add any shipping fees or sales tax.

*You will receive this update via email, so be certain to provide a current email address that will accept attachments totaling approximately 1.5 MB. Only the new files will be emailed.*

To order, fill in all information below. Enclose a check to Calculus In Motion (US \$), purchase order, or MasterCard / VISA information, and send via postal mail or fax to:

**Postal Mail:** Calculus In Motion  
1725 N. Niagara Street  
Burbank, CA 91505

**FAX:** 818-845-6332
